

Disclosure of Financial Interests

The development of new technologies and treatments for diseases of the spine are often developed through collaborations between commercial organisations and specialists who work in the field. These collaborative relationships are important for advancing and improving patient care. This is recognised by the Australian Orthopaedic Association (AOA) in its Code of Conduct and its Position Statement on Interaction with Medical Industry 2020.

Dr Matthew Scott-Young is often at the forefront of innovation in patient care, research and medical devices. He contributes his expert knowledge to the development of spine care technologies and treatments either freely or is compensated through commercial arrangements with the medical industry. Dr Scott-Young has invented spinal implants for use in both the lumbar and cervical spine. Dr Scott-Young only participates in arrangements that are conducted in accordance with the AOA's Code of Conduct.

Dr Scott-Young ensures that his patients are aware of his financial interests by posting this information on his website and in discussions about surgery he recommends.
